1. EXECUTIVE SUMMARY

- a. It would not be wrong to describe the last few years as the transformation of the world of cryptocurrency. The growth of cryptocurrency has been faster than ever with many consumers foraying into crypto world and crypto trading for the first time particularly with much time in their hands during the COVID 19 pandemic.
- b. Cryptocurrency, once only understood among a relatively fringe community of investors, is fast becoming a popular word all across the globe. Experts and analysts predict that the global cryptocurrency market will more than triple by 2030, hitting a valuation of over \$5 billion.
- c. What is beyond doubt is the fact that investors, businesses, and brands can no longer ignore the rising tide of crypto.
- d. However, crypto can't seem to escape paradoxes anywhere. Investors feel safer with regulated systems and products, yet at the same time same most investors are worried about the impacts that regulation will bring about. Furthermore, many investors have become eco-conscious, but crypto world has a huge carbon footprint.
- e. At GIFA Group we have embarked upon building our own crypto token which would be a holistic cryptocurrency network with strong emphasis on enhanced user experience, better value proposition, educational, and secure.
- f. We are developing the GIFA Token digital currency wallet, which would enabling users to navigate with us throughout the development journey following a coherent roadmap established to steer this project. This project will be designed, build, tested, before a full marketing takes place. GIFA will provide GIFA Token users an ecosystem that is highly secure and allows them to derive the best value from their interactions.

1.1 Participants in the GIFA ecosystem will be able to accomplish the following:

- a. Exchange the GIFA token seamlessly for other currencies or services.
- b. Cross-platform operations as GIFA will be available on Android, iOS, and Web.
- c. Buy and sell cryptocurrency on a dedicated exchange.
- d. Store, send, and receive cryptocurrency using a dedicated wallet.
- e. Access to a decentralized economy and highly secure financial services.

1.2 Driving the GIFA platform is the versatile GIFA token that is built using the versatile Ethereum-based ERC-20 protocol. The GIFA token will allow users to enjoy unparalleled utility value by helping them utilize the token to settle payments, transfer funds, exchange for other currencies, and much more. Finally, the GIFA Initial Coin Offering (ICO) will help accelerate the development and deployment of the GIFA ecosystem in a systematic and efficient manner.

2. Introduction

2.1 History of GIFA TOKEN PROJECT & GIFA Cryptocurrency

- a. The GIFA Token Project refers to the special virtual currency Token which is being developed by GIFA Group of Companies since September 2020. The GIFA Token shall become an instrument representing fungible and tradable assets or utilities that reside “on the blockchain”. Intention is to use the GIFA Token to fundraise through ‘crowdfunding’, in order to help accomplishment of new GIFA projects. This Project is independent entity currently based in the Turkish Republic of Northern Cyprus (the “TRNC”).
- b. The GIFA Token Project has been in developmental stage since the start and is being developed with the support and expertise of third-party developers, crypto marketing and PR Agencies in order to create, distribute, sell and circulate the GIFA Token through the standard initial coin offering (ICO) process.
- c. GIFA strongly believe that the future success of all business will, at some point, cross paths with the fast-developing blockchain and artificial intelligence

technologies. GIFA strongly believe that blockchain and artificial intelligence (AI) have evolved into leading technologies that power innovation across almost every industry. As such, GIFA intend play a role in this technological evolution.

- d. The GIFA Token Project development will be achieved in incremental stages and will be a long journey, but ultimately, it will assist GIFA becoming a globally competitive company. Through a consistent and solid execution effort, GIFA will strive to ensure that this Project becomes a sustainable ongoing business venture integrated as part of the GIFA Group of companies.
- e. The GIFA Token Project has been carefully developed under the management and guidance of GIFA Group of companies.
- f. The Project is being developed with the intention that it remain a key business venture of GIFA business, even beyond the developmental stage. The development of the GIFA Token Project (which includes the GIFA Token, as well as the GIFA Token Exchange Platform) is ongoing with an anticipated completion timeline of August 2022.
- g. The GIFA Token Project is intended to raise significant curiosity and encouragement from GIFA's network of business contacts and associates. Although limited marketing engagement is expected in the first 2 (two) years of development, helping to provide GIFA with insight into the global cryptocurrency market. At the same time GIFA expects to execute protocols with several real estate projects to help them tokenise their projects and raise funding through crowdfunding, through the use of GIFA Tokens.
- h. The process will involve reserving a pre-agreed number of GIFA Tokens which will be allocated to a particular 3rd Party project (i.e. real estate project) whereby permitting the project owner to crowdfund, using GIFA Tokens.

- i. Until such time that each such project is fully ready and active (i.e. the necessary planning requirements are met and clear construction timelines are set etc.), the 'Crowdsale' of the GIFA Tokens cannot commence and no funds can be transferred (received or wired) from any individual or entity.
- j. At the end of the developmental stages of this Project, the users and subscribers will have an opportunity to open GIFA Token 'Wallet' accounts and GIFA 'Exchange Platform' accounts.
- k. GIFA Token will only be made available in certain jurisdictions once a review of legal and regulatory regimes in each respective jurisdiction, on both a country and state level (as applicable) is conducted.
- l. GIFA shall continue to observe and learn how different nations approach token, coin and exchange regulations, and will take all necessary measures to stay up-to-date on any upcoming legislations which could alter GIFA's compliance obligations in each prospective jurisdiction.
- m. The Group's main operations are global and are always subject to the legislative requirements of the jurisdiction in which it operates.

2.2 Joining the Pioneers of the Cryptocurrency Digital World

- a. Through the development of the GIFA Token Project, GIFA Group of companies have decided to embark upon on a bright new journey and join the World of Cryptocurrency Pioneers. Year 2020 will be remembered in the history of GIFA as the year when GIFA became one of the pioneers of the evolution shifting 'traditional' systems to a digital one where new phase of technology-driven markets have the potential to disrupt conventional market strategies, longstanding business funding practices and established regulatory perspectives—all to the benefit of consumers and broader macroeconomic efficiency. This new and exciting change pushing ahead with the Cryptocurrencies as the 'future of global market strategies' carry ground-

breaking potential to allow, consumers from all over the world, access to a global payment systems—anywhere, anytime—in which participation shall be restricted only by access to technology, rather than by traditional factors.

- b. GIFX Cryptocurrency Exchange Platform and GIFX Token shall provide anyone and everyone or any business the opportunity to instantly subscribe to, join, trade or exchange with other lead cryptocurrencies globally.
- c. Surely that is a powerful proposition and demonstration of self-confidence by our GIFA Group of companies, particularly when the underlying systems for global transactions are “fragmented and complex”. However, our starting point is a well-accepted knowledge that the current global system is costly, unreliable and slow and needs to change and allow the new digital technologies to influence such a change.
- d. This is the key underlying reason that GIFA Group of businesses have embarked upon providing and offering its’ own cryptocurrency (GIFX) with both a platform and the token to assist and facilitate ground-breaking response to meeting individual and business developmental needs. GIFX Cryptocurrency exchange and GIFX Token shall be an open-source protocol which is designed to allow fast and cheap transactions using the most advanced blockchain technology available. GIFX Token shall become a sought-after digital currency that can be used by anyone, anytime and anywhere or, as “a better method or a system”.
- e. The message to anyone yet to become aware of cryptocurrency companies is, now is the time to start doing your homework and prepare for the future which certainly looks to be bright. GIFA Token will most definitely be part of that bright future.
- f. GIFA Token Project vision is to create a much-needed disruption in the traditional system and the sector. Through GIFX cryptocurrency, the aim is to

offer users and subscribers the opportunity to create a single account which would ultimately lead to a smooth transition from the fiat and cryptocurrency world. We aim to provide our customers with a formal wallet accounts that come with a built-in GIFX Token wallet for secure token storage and the ability to perform their necessary transactions.

2.3 Mission & Vision

2.3.1 Mission

- n. Create a well networked cryptocurrency exchange platform (www.gifxtoken.com) and cryptocurrency token (**GIFX**) that is considered by users as safe and accessible for everyone. GIFA Token Project have a clear mission that the GIFX Team shall endeavour to providing a secure, reliable and convenient gateway between the contemporary finance world and the new world of digital currencies in a responsible manner. At GIFA and through GIFX Cryptocurrency Exchange Platform and GIFX Token our Team shall strive for a new world, in which everyone can opt to act as their own bank and able to remain in complete control of their own assets; be their own bank! As GIFA Token Project we are convinced that cryptocurrencies will continue to play a key role in the economy of the future. This conviction guides our GIFX Team as they assist as many people and businesses as possible globally in the buying and trading and exchanging (with other lead cryptocurrencies such as BTC, BCH, ETH, LTC, USDT, SOLANA, XRP and more..) of GIFX Token and other cryptocurrencies.

2.4 Vision

- a. **“GIFX Token Cryptocurrency in every Wallet** - It is our vision to ensure and contribute to the adoption and applicability of GIFX Token and ensure GIFX Cryptocurrency Exchange Platform becomes reputable, trustworthy, reliable and sought-after digital currency instruments that can be used by anyone, anytime and anywhere or any business, as “a better value instrument” to achieve a positive impact on users’ lives.

3. Problem Statement and Our Strategy

The current crypto-sphere is plagued with a number of problems that inhibit the adoption and growth of decentralized currencies.

3.1 Complicated and Confusing Technology

Even today, one of the main factors limiting the widespread adoption of cryptocurrency is a lack of knowledge on the user's behalf. Many individuals find it difficult to venture into this sector due to its highly technical nature. In turn, this knowledge makes many susceptible to misinformation and increases their vulnerability to scams. In order to derive the benefits of cryptocurrency, one should be aware of industry-practices and better liquidity. Unfortunately, this information is not privy to the common man, thereby placing them at a disadvantage and keeping the inclusive crypto-sphere out of reach to millions of potential users around the world.

3.2 Poor Platform Design

Cryptocurrency might be "the technology" to consider being part of right now. However, several users have to jump through several hoops in order to make exchanges into cryptocurrency. Moreover, most exchange platforms support only a limited number of cryptocurrencies. This practice proves highly disadvantageous to new users or small traders as the constant transfer of funds incurs high costs and is time-intensive. There is a dire need for exchanges that enable quick and user-friendly transactions between different crypto and currencies on the same platform.

3.3 Unclear Value Proposition

Several cryptocurrencies have been launched to tackle a specific problem. However, they do not possess correct incentivization programs that allow users to engage with the cryptocurrency at a new level. This is further impacted by the lack of knowledge of the intrinsic benefits of a cryptocurrency by a majority of its participants. In fact, today, many people view cryptocurrency as speculative options and interact with it in the same way they would with the stock market.

3.4 Security Threats

The security risk is a constant threat to the participants in the crypto-sphere. It is not uncommon to hear of exchanges that have been hacked and its users losing millions of dollars worth of cryptocurrency. Furthermore, there is also an overwhelming presence of scams attributed to cryptocurrency, where users who have invested in cryptocurrency projects find themselves exposed to fraud in the months that follow. The presence of these risk factors has resulted

in lower confidence and adoption of cryptocurrency as a potential value exchange instrument or asset class.

User Experience	A limited number of people actually have hands-on experience and understanding of the cryptocurrency world, coupled with a poorly designed user experience that does not delight or satisfy mainstream users.
Value Proposition	Weak value propositions do not incentivize people to use crypto for purposes other than speculative trading.
Complexity	Lack of knowledge and understanding of the workings of cryptocurrency and different terms within. Difficult to understand and invest in new-to-crypto users.
Security	Damaged user confidence from crypto-related fraud and theft.

4.0 PROPOSED SOLUTION

To overcome the challenges presented in the previous section, GIFA will be building an extensive ecosystem that comprises of three key products, namely:

1. GIFA Token
2. Cryptocurrency Exchange
3. Wallet and Financial Services

4.1 Our Strategy

To tackle the challenges above, we are offering products along 3 verticals:

This would enable us to leverage payment solutions as the primary tool for driving adoption and user acquisition while building trading and value exchange services and solutions as the major sources of revenue.

This strategy creates and self-sustains a virtuous cycle: value exchange channels bring users onto the platform, whereas trading and value exchange services generate revenue that can be redirected.

Our product solutions across three verticals are building up a sustainable ecosystem that serves our mission: Accelerate the World's Transition to GIFX Cryptocurrency

4.2 GIFA Token

GIFA is a token that uses the ERC-20 protocol and is built on the Ethereum network. This token will be the main unit of exchange in the multifaceted and decentralized GIFA ecosystem.

GIFA will operate as a utility token that can be employed extensively on the platform to access a variety of products and services. Additionally, users can utilize the GIFA token to pay for fees, transfer crypto values, and even settle invoices .

The GIFA token will be integrated with the other offerings of the GIFA platform, thereby allowing users to unlock the true value from their token holdings. Additionally, the GIFA token is linked to the share value of GIFX, thereby presenting the users with better exchange value.

4.3 Cryptocurrency Exchange

The second product planned under the GIFA banner is a multi-currency crypto exchange. This trading platform will enable users to buy and sell a variety of cryptocurrencies easily. Additionally, this is a unified platform that supports standard-currencies-to-crypto transactions, thereby benefiting the users tremendously.

The exchange services will also support cross-platform functionality. This way, the user can access trading services on their Android and iOS devices as well.

Finally, premium security features shall be enforced, such as 2FA verification, multi-sig wallets, etc. to protect the user's data and available value assets against instances of hacking.

4.4 Cryptocurrency Wallet

In addition to the token and multi-cryptocurrency exchange, GIFA will also feature a cryptocurrency wallet. This product allows users to store and manage their funds securely and efficiently on the blockchain protocol.

The GIFA cryptocurrency wallet will support a number of top cryptocurrencies, including Bitcoin, Ethereum, Ripple, etc., besides the GIFA token. Additionally, the wallet allows cross-platform function, thus allowing users to access their funds from any device - desktop or mobile.

The main purpose of the GIFA multi-currency wallet is to unlock easy access to crypto-based transactions for the common user. By possessing a simple UI and rich features, the GIFA wallet will bring the benefits of cryptocurrency and blockchain to everybody.

GIFA wallet users will enjoy the following advantages:

- Low fees
- User-friendly UI
- Top-notch security features
- Support for multiple cryptos and standard-currencies
- Complete control over all functions

5.0 TOKENOMICS

5.1 ICO Details

TOKEN NAME	GIFA
TOKEN TICKER	GIFA
TOKEN TYPE	ERC-20 (Ethereum-based)
DECIMAL SUPPORT	15 places
TOTAL TOKEN SUPPLY	Available 150,000,000 GIFA (150 Million GIFA) PLUS IN RESERVES 19,950,000,000 GIFA (19.95 Billion GIFA)
TOKEN PRICE (in USD)	\$ 1 (ONE USD)
ACCEPTED PAYMENT METHODS	BTC, BCH, ETH, LTC, XRP, USDT

6.0 Funds Utilization:

6.1 Business Development Strategy

There comes a time in every company's journey where they take the next step to grow their business. At GIFA Group of Businesses we are always looking for new opportunities to expand our operations and promote our brand GIFA or expose our brand to new potential clients and associates throughout different continents.

As well as strategic planning we are also undertaking significant amount of business planning.

GIFA has embarked upon building a network of businesses, from across many continents, which are either currently accepting crypto as payments or are willing to accept crypto as payment. We shall be particularly focussed over the next 3 years on introducing GIFA Token (GIFX) as an accepted and used crypto by many businesses, private entrepreneurs and private individuals as possible.

With the sale of GIFA Token we are looking to raise finance to expand and develop the following businesses:

Project name	Brief description	Geographical Target
1. Establish and promote Global & Regional Supply Demand Chain Trade Platform	Providing trading online platform for public at large, and for small and medium size businesses from different sectors and continents to buy and sell products.	Global and Regional
2. Transactions & Crypto Currency Trading	Blockchain powered value transfers, crypto exchanges, transactions and digital assets management, business development facilities shall be offered.	Global and Regional
3. GIFALAND LEISURE & CULTURAL THEME RESORT	Featuring various attractions, such as rides and games, as well as Theme Park Hotels and model built cultural sites for entertainment and educational purposes	Major attraction brand in Europe and Middle East

4. Power Sustainable Journalism & Media	Blockchain technology –allows for building decentralized apps – holds promise for developing a sustainable journalism eco-system. Developing a media business model based on blockchain, moving the conversation out of the theoretical realm and into practical, real-world use.	Mediterranean, Europe and Middle East
5. Retirement Lifestyle Villages	Purpose built villages and housing complex designed for older adults and the retirement communities.	Europe & Regional
6. GIFA Innovation & Incubation Centre	GIFA Crypto Token aims to become a key player in linking Blockchain technology with the business world, science and inviting and accompanying newcomers with new business venture ideas (innovators of NEW businesses) to come under GIFA Token Project and receiving support in all the stages of setting up and further developing their ideas.	Local & Regional (Mediterranean/Middle East & Europe)
7. GIFA B2B Social & Business Networking Platform	Creating and promoting the use of B2B social media platform; helping businesses to network using social media and blockchain technology getting into video, repurpose long-form content into micro-content, and find ways to communicate visually.	Local & Regional (Mediterranean/Middle East & Europe)
8. GIFA B2B Asset Backed Tokenization Scheme	Offering tokenisation opportunity to wide ranging businesses and projects looking – tokenisation as a blockchain-based units of value that are pegged to real-world assets, such as company shares, real estate, diamonds, or commodities.	Local & Regional (Mediterranean/Middle East & Europe)
9. Gifa Nektar Import & Export Limited	This is already an established Company within the GIFA group of businesses aiming to use blockchain technology to market citrus fruit and fruit juices. Currently negotiating with manufacturers/ producers of citrus fruit and fruit juice to secure long term deals.	Local, Regional, Global (Mediterranean/Middle East & Europe)

7.0 ROADMAP

7.1 Milestones

Year 1 Development of GIFA TOKEN and ICO	
Year 2 Project Realisation (proposal, scheme, design, implementation, evaluation)	
Year 3 2nd Tokenization process and growth of GIFA Brand Business	
1.	GIFX Token Concept development
2.	GIFX Token Design prototypes
3.	GIFX Token design. Protocol architecture
4.	Development & launch of GIFX Cryptocurrency Exchange Platform
5.	GIFX Token sale 150,000,000 (One hundred and fifty million tokens) AND (IN RESERVES 19,950,000 GIFA – 19.95 Billion GIFA)
6.	Initial consumer-facing deployments
7.	Further consumer-facing deployments
8.	Offer GIFX Token mobile wallet app, both for Android, iOS and Huawei.
9.	Ensure that GIFX Currency Exchange Platform supports BTC, ETH, PMA and all ERC-20 tokens.
10.	Add other leading currencies to be on GIFX Exchange Platform and for GIFX to be on minimum 4 other Cryptocurrency Exchange Platforms
11.	Recruit 150 Users in the first 6 Months
12.	Recruit and open minimum 1000 Wallets by Year 2
13.	Facilitate minimum of 150 Daily Exchange through GIFX Cryptocurrency Exchange Platform

8.0 The Team GIFX

8.1 How it all started

As the story goes, on October 31st, 2008, someone using the still mysterious pseudonym Satoshi Nakamoto first published the Bitcoin white paper. It was hardly a coincidence that this publication occurred at a time when the financial markets were crashing. The white paper described how Bitcoin or cryptocurrency would provide a solution to the problems inherent to the current monetary system. The idea was that the cryptocurrency would signify the end of the centralisation of power and the endless printing of money within the financial system. It has now become more-clear that the cryptocurrency allows a user to autonomously manage their assets, and as such, it offers the first step towards financial freedom. For the first time in history, a form of value exchange came into being of which the maximum circulation had been set in stone from the beginning. In other words; further inflation has become impossible. This, in short, is what cryptocurrency stands for.

Hence, of course, why GIFA (GIFA Token Project) has joined the pioneers reshaping the future of the financial systems as we know it. We are here, full of confidence, with our own digital token, **GIFX** to ensure we take our position in the reshaping of the global financial markets.

It is envisaged that the GIFA Token shall become part of GIFA Group of businesses and will be led by a NEW Team of Consultants and Experts to be recruited solely for this purpose.

9.0 Disclaimers

9.1 Licences and approvals are not assured in all jurisdictions

9.1.1 GIFA Token Project (“www.gifatoken.com”) intends to operate in full compliance with applicable laws and regulations and use its best endeavours to obtain the necessary licenses and approvals. Regulatory licences and/or approvals are likely to be required in a number of relevant jurisdictions in which relevant activities may take place. This means that the development and roll-out of all the initiatives described in this whitepaper are not guaranteed. It is not possible to guarantee, and no person makes any representations, warranties, or assurances, that any such licenses or approvals will be obtained within a particular timeframe or at all. As such, the initiatives described in this whitepaper may not be available in certain jurisdictions, or at all. This could require a restructuring of these initiatives and/or its unavailability in all or certain respects. In addition, the development of any initiatives is intended to be implemented in stages. During certain stages of development, the project may rely on relationships with certain licensed third-party entities. If these entities are no longer properly licensed in the relevant jurisdiction, this will impact the ability of GIFAtoken.com to rely on the services of that party.

9.2 No advice

9.2.1 This whitepaper does not constitute any investment advice, financial advice, trading advice or recommendation by gifatoken.com, its affiliates, or its respective officers, directors, managers, employees, agents, advisors or consultants on the merits of purchasing GIFA Tokens (GIFX) nor should it be relied upon in connection with any other contract or purchasing decision.

9.2.2 Furthermore, this whitepaper does not constitute a prospectus or financial service offering document and is not an offer to sell or solicitation of an offer to buy any security, investment products, regulated products or financial instruments in any jurisdiction. GIFA Tokens (GIFX) are not being structured or sold as securities in gifatoken.com. Owners of GIFA Token (GIFX) are not entitled to any rights in gifatoken.com or any of its affiliates, including any equity, shares, units, royalties to

capital, profit, returns or income in gifatoken.com or any other company or intellectual property associated with gifatoken.com.

9.3 No representations

9.3.1 No representations or warranties have been made to the recipient of this whitepaper or its advisers as to the accuracy or completeness of the information, statements, opinions or matters (express or implied) arising out of, contained in or derived from this whitepaper or any omission from this document or of any other written or oral information or opinions provided now or in the future to any interested party or their advisers. The GIFA Tokens (GIFX), as envisaged in this whitepaper, are under development and are being constantly updated, including but not limited to key governance and technical features. If and when the GIFA Tokens (GIFX) are completed, they may differ significantly from the description set out in this whitepaper. No representation or warranty is given as to the achievement or reasonableness of any plans, future projections or prospects and nothing in this document is or should be relied upon as a promise or representation as to the future. To the fullest extent possible, all liability for any loss or damage of whatsoever kind (whether foreseeable or not and whether or not gifatoken.com has been advised of the possibility of such loss or damage) which may arise from any person acting on any information and opinions contained in this whitepaper or any information which is made available in connection with any further enquiries, notwithstanding any negligence, default or lack of care, is disclaimed.

9.4 Third party data

9.4.1 It must be noted that this whitepaper contains data and references obtained from third party sources. Whilst the GIFA Group of Businesses believes that these data are accurate and reliable, they have not been subject to independent audit, verification, or analysis by any professional legal, accounting, engineering, or financial advisors. There is no assurance as to the accuracy, reliability or completeness of the data.

9.5 Translations

9.5.1 This whitepaper and related materials are issued in English. Any translation is for reference purposes only and is not certified by any person. No assurance can be made as to the accuracy and completeness of any translations. If there is any inconsistency between a translation and the English version of this whitepaper, the English version shall prevail.

9.6 Restricted transmission

9.6.1 This whitepaper must not be taken or transmitted to any jurisdiction where distribution or dissemination of this whitepaper is prohibited or restricted.

9.7 Views of gifxtoken.com
